NOTE

- Rated loads shown in the chart are based on the crane strength with the outriggers fully extended on a firm level ground and on the actual working radius including the deflection of boom.
- The weights of hook (66 Lbs. / 30 kg.), slings, and any accessories attached to the boom or loadline must be deducted from the above capacities in the chart.
- Capacities shown must reduce in accordance with vehicle weight and loaded condition of truck, crane mounting position, and operating speed.
- The figures in relation to the speed are on the basis of no-load running at rated oil flow conditions.
- In accordance with our policy of constant product improvement, all specifications are subject to change without notice or obligations.
